EDUCATION

Adamson University B.S. in Computer Science — Academic Merit Award	Ermita, Manila City August 2022 - July 2026
--	--

WORK EXPERIENCE

Philtech Inc. Pharmacy Technology & Engineering Intern	BGC, Taguig City March 2026 - June 2026
--	--

- Secured a direct internship placement at the Philtech Innovathon for Universities by designing a multi-step agentic AI workflow using RAG-based LangChain to automate near-expiry inventory detection and generate personalized recipe recommendations.
- Analyzed and validated 30+ risk assessment reports across enterprise pharmacy applications, strengthening knowledge of pharmacy system workflows while improving documentation accuracy and supporting audit readiness.
- Collaborated with cross-functional, international pharmacy teams to troubleshoot and resolve 75+ software incidents, applying structured root-cause analysis to improve workflow efficiency and incident response time.

Adamson Computer Science Society Vice President for External Affairs	Ermita, Manila City July 2025 - June 2026
--	--

- Grew event partnerships by 166% in three months through proactive outreach and stakeholder relationship management, securing sponsorships from local and international technology companies.
- Directed the planning and execution of a community outreach program in partnership with local LGUs, coordinating with government stakeholders to reach 100+ community members.
- Led end-to-end organization of an inter-university HackerRank pair-programming competition (project planning, platform setup, and delegate management) for 24 participants, including 14 delegates from external universities.

RELEVANT PROJECTS

AGRID: Optimizing Farmers' Market Reach Using Multi-Feature Clustering and DBSCAN for Recommender System Within Rosario, Batangas. Recommendation System Data Analytics, Machine Learning, Web Development (Vue.js + PHP)

- Presented and published research at the IEEE-indexed International Conference on Business and Industrial Research (ICBIR 2026) in Bangkok, Thailand.
- Collaborated with partner LGU stakeholders to gather requirements, align project milestones, and translate client needs into technical solutions.
- Built, trained, and evaluated a custom DBSCAN clustering model from scratch to optimize market reach without requiring complex metrics in data-sparse environments, achieving a Davies-Bouldin Index (DBI) of 0.87.
- Constructed modular front-end components using Vue.js for the e-commerce web platform, ensuring a consistent and responsive user interface.

S.I.Y.L.: Detecting Vehicle Intrusion in Bike Lanes Within Metro Manila Computer Vision YoloV7, OpenCV, Python
--

- Developed a real-time vehicle intrusion detection system using YOLOv7 and OpenCV to identify unauthorized vehicles in bike lanes.
- Trained and evaluated custom object detection models on 5,000+ annotated images, achieving 86.2% mAP.
- Authored the Software Requirements Specification (SRS) and technical documentation for the project.

STUBY: Your Number 1 Study Buddy Android Application Full-Stack Mobile Development, QA, Java, XML

- Developed a native Android study application using Java and XML, implementing spaced repetition to improve knowledge retention.
- Designed and implemented core features including flashcards, study scheduling, progress tracking, and personalized review reminders, owning the project end-to-end from design through Quality Assurance.

AWARDS & RECOGNITION

- 2nd Runner-Up and People's Choice Award**, CS:IGNITE — Research that Sparks (Inter-Department Research Symposium)
- 2nd Runner-Up**, CCIT Research Innovation Symposium and Expo (Inter-College Research Symposium)
- 3rd Place**, Entrepinoy MSME Conference — Agriculture Industry Reverse Pitching for Students (NCR-Wide Innovathon)
- Finalist and Hatchling Dynamo (Individual Award)**, The Hatch 2025: Gateway to Global Innovation (Startup Innovathon)

SKILLS & COMPETENCIES

Programming Languages: Python, Java, C#, SQL, JavaScript, XML, PHP
Frameworks & Tools: LangChain, Vue.js, Git, OpenCV, Pandas, NumPy, Scikit-learn, Matplotlib
Technical Areas: Machine Learning, Data Analytics, Computer Vision, Agentic AI, SDLC, Requirements Analysis, Problem-Solving
Professional Skills: Cross-Functional Collaboration, Stakeholder Communication
